DETAILED ACTION

Allowable Subject Matter

1. Claims 28-42 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention provides the novel aspect of controlling the stiffness of a catheter guide device by stretching a first central hollow elongate body radially outward in order to press a plurality of second elongate bodies against the inner wall of the catheter sleeve in order to impart stiffness and rigidity. It differs from the prior art of record in that there is a plurality of second elongate bodies surrounding and axially extending with the central body in a side by side manner wherein the second elongate bodies are freely movable in relation to each other in order to impart a certain degree of flexibility to the guide device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
